## **DETAILED ACTION**

## **REASONS FOR ALLOWANCE**

The prior arts of record do not explicit teach or render obvious the invention as recited in the independent claims.

The Huang et al. (U.S. Pat. No. 6,226,669 B1) prior art discloses real-time interactivity across a shared multiple-participant with the purpose of allowing plural number of users to participate in a 3D virtual-reality world. The shared multiple-participant 3D virtual-reality environment utilizes a Dead Reckoning method with a predetermined optimal Dead Reckoning threshold to help reduce the rate of object-state PDUs that are generated in response to changes in each user's avatar state. The Dead Reckoning method is further used to generate object-state PDUs in order determine whether the plural users via avatar, could interact. However, the invention as claimed "wherein the client is arranged to obtain information from said server means about the status of the adjacent zone before the avatar enters the adjacent zone only when the likelihood of the avatar moving within the predetermined range of the boundary of said adjacent zone is above a threshold" when taken in the context of the claims as a whole, was not uncovered in the prior art teaching.

Nor were references uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill in the art at the time the invention was made, knowing of the Dead Reckoning method, would have integrated or modified to teach a client arranged to obtain information from said server means about the status of an adjacent zone before an avatar enters the adjacent zone only when the likelihood

Art Unit: 2194

of the avatar moving within the predetermined range of the boundary of said adjacent zone is above a threshold.

Dependent claims are allowed as they depend upon allowable independent claims.

Any comments considered necessary by Applicant **must** be submitted not later than the payment of the issue and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Anya whose telephone number is 571-272-3757. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Thomson can be reached on 571-272-3718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
